## Flex Fit - Bases

Bed bases come in many different varieties, from divans with fully sprung or platform tops to bedsteads. It's important to bear in mind that the comfort level and life span of your mattress is affected by the choice of base. At Bodyease, we have a long history of creating innovative designs for quality adjustable beds. We are proud to be one of very few companies who have an in-house design team dedicated to creating complete sleep systems, including both mattresses and bed bases. We understand what makes the perfect adjustable bed, and we are passionate about helping you find a base and mattress combination that is right for you.

### Bedstead

Our modern Bedsteads are made from wood and are an excellent example of the quality craftsmanship that is at the heart of all our designs. Featuring luxury chenille fabrics and a beautiful upholstered footboard, our Bedstead base is guaranteed to add a sense of luxury and style to your bedroom. Bedsteads generally come flat-packed for simple self-assembly, and are extremely easy to manoeuvre into your house.

### Deep Base

The beauty of our Deep Base design is that it can be upholstered in the same matching fabric as the mattress you choose, offering you the chance to create a beautifully consistent look that transforms this from a bed into an elegant piece of furniture that will be the centrepiece of any boudoir. This base has a distinct feeling of quality about it and it's solid design means it reaches almost to the floor.

### Deep Contour

Our Deep Contour design is a luxurious addition to any bedroom. The sleek curved edges of the footboard make it easy on the eye and the headboard features a simple, contemporary design that will compliment any bedroom décor. This design might look sleek but it has extra strength and durability built in and it is available with a choice of 'stand-out' wooden and brushed aluminium leg styles to suit your individual taste.

## Shallow Contour

Our Shallow Contour base is one of our newest designs and has evolved from the popularity of our Shallow Base design. This elegant adjustable base combines quality craftsmanship with stunning design. Choose a rejuvenating full body massage or focus on a particular area of your body with the easy-to-operate controls.

### Latex Mattress

The natural elasticity of a latex mattress allows it to spring back into shape as you move in bed, helping you find your most comfortable sleeping position. Latex foam mattresses have excellent heat reduction and breathable properties, which are more efficient at regulating temperature than any type of foam. This allows the mattress to breathe and helps keep it fresh. Latex is a natural product that is very useful for mattresses as it is hypoallergenic and antimicrobial, which prevents dust, mould and bacteria from settling in the mattress. This makes a latex mattress particularly suitable for you if you suffer with allergies.

### Gel Mattress

---

To ensure a sleep that makes you feel well rested and relaxed, this mattress is made with a gel infused foam that is the most advanced sleeping material on the market. It resists motion transfer and reduces pressure on shoulders and hips. It's also antimicrobial and very durable and the gel allows increased airflow, so you can stay cooler at night. With the addition of gel, you get all the benefits of traditional memory foam without the problems of heat regulation that some people experience.

### Memory Foam Mattress

---

Experience the feeling of weightlessness with our luxury memory foam mattress. Memory foam has a unique open cell structure that reacts and responds to body heat and weight by moulding to the contours of your body, therefore optimizing the support it can give you by almost eliminating all pressure points that can be known to cause discomfort. It is the most effective material for relieving aches and pains. It can also be used for prevention of pressure sores and has multiple orthopaedic and other health benefits, which make a huge difference to the quality of your sleep.

### Pocket Sprung Mattress

---

Pocket sprung mattresses are one of the most comfortable mattresses with an effective design that provides high levels of comfort and support where it's needed most. They are designed to contour with your body and are constructed of numerous individual springs that move independently, giving an exceptional amount of support and cushioning. A pocket sprung mattress uses these individual springs to respond to everyone's individual body weight, increasing their usability and comfort and making them an excellent choice for most people.
